

Manure Conditioner™

A dry manure detoxifying and biological stimulant technology

GENERAL INFORMATION:

Manure Conditioner's main function is to tie-up toxins in the manure that slows manure microbial digestion. Treating manure with **Manure Conditioner** helps reduce pathogens by stimulating beneficial microbes, reducing ammonia release and overall odor, as well as increase decomposition, phosphorus/nitrogen retention and availability. It also aids in the reduction or elimination of top solids and bottom sludge. It is recommended to use **Manure Conditioner** in conjunction with **Manure Master Plus** or **Manure Master Plus–Organic**.

Treatment Protocol:

- **Swine Manure:** 500 lbs per million annually.
Apply 100 lbs to start and remaining 400 lbs as needed throughout the year (4 treatments).
- **Dairy/Beef:** 1,100 lbs per million annually.
Apply 100 lbs to start and 100 lbs monthly or as needed throughout the year (10 treatments).

It is recommended to apply Manure Conditioner over the top of the manure, then apply Manure Master Plus or Manure Master Plus–Organic over the Manure Conditioner. It's best to mix into the liquid portion of the manure. Agitation after treatment will enhance the manure digestion. Both products can also be applied in the loadout or manure induction pump.

INGREDIENTS: Naturally-occurring, unaltered oxidized lignite.

ENVIRONMENTAL IMPACT

The premicrobial digestion of liquid manure that has been treated with Manure Master Plus/Manure Master Plus–Organic and Manure Conditioner, before field application, may improve soil health and help reduce the likelihood of water quality issues. 100% natural. Safe for animals.

ORGANIC CERTIFICATION

Manure Master Plus–Organic and Manure Conditioner can be approved for organic production. Growers/producers are encouraged to contact their organic certifier before using these products.
