

SmartFLAXTM

BEDDING

*100% All Natural FLAX BEDDING
for All Types of Animals*

Absorbs more odor and moisture than common bedding materials such as straw, wood shavings or sawdust.

SmartFLAX Bedding is an eco-friendly, biodegradable 100% all natural flax bedding for all types of animals. Non-allergenic and less dusty than most conventional beddings, it absorbs more odor and moisture than common bedding materials such as straw, wood shavings or sawdust. Its absorbent characteristics require less bedding and less disposal volume. **SmartFLAX Bedding** makes an excellent plant/animal based compost fertilizer.

SmartFLAX Bedding

- Packaged in biodegradable paper bags
- Available in 2.2 cubic foot bags and up to 1,000 lb tote bags with pallet
- Application rate varies according to animal comfort. Apply the necessary volume for odor control and dry bedding maintenance.

Benefits of SmartFLAX BEDDING:

- Supports animal health, comfort and welfare
- Less dusty than most conventional beddings
- Absorbs more ammonia than common bedding materials
- Strong moisture absorbance capacity ensures a dry bedding area for animals
- Insulation effect, which helps prevent animal heat loss in cold weather
- Requires up to **50 percent** less bedding volume than straw or wood shavings
- Improves cleanliness and appearance of animals
- Improves barn or stable appearance
- Less bedding volume equals reduced labor and disposal costs
- Derived from a natural and renewable source
- Faster biodegradable breakdown when applied to soil in comparison to wood based bedding
- Particle size is easy to spread
- Fire-resistant
